Raghav Raj Sobti

Cinematographer (NYFA Alum) & Creative Technologist.

Gurugram, Haryana, India

Summary

In an industry that often gatekeeps knowledge, I take the "Open-Source" approach. I use my platforms to deconstruct my own work, sharing the how and why behind every shot. I believe that by teaching the details—from node trees to lighting diagrams—we elevate the entire community.

I specialize in: Cinematography: Creating distinctive lighting setups and compositions that break the mold. Color Grading: crafting custom LUTs and looks that give brands a unique visual identity. Technical Workflow: ensuring the image pipeline is flawless from set to post.

If you are a brand looking for a unique visual voice, or a filmmaker who loves geeking out over technical details, let's connect.

Experience

Self Employed

3 years 9 months

Freelance

March 2025 - Present (1 year)

Delhi, India
